DETAILED ACTION

Response to Amendment

This Office Action has been issued in response to amendment filed 27 April 2007. Applicant's arguments have been carefully and fully considered and are persuasive.

Claim Status

Claims 1-23 remain pending and are ready for examination.

Allowable Subject Matter

Claims **1-23** are allowed.

The following is an Examiner's statement of reasons for allowance: the prior art made of record fails to teach the combination including the limitation of:

(Claim 1) "...a power saving mode execution section which refers to said access time stored in said memory and sets a number of said hard disk drives according to the redundancy of said RAID group to a power saving mode when the difference between a current time acquired from said time counting mechanism and said access time exceeds a certain time. ...";

(Claim 8) "...a power saving mode execution section which refers to said access time stored in said memory, sets, for a RAID group whose difference between a second time acquired from said time counting mechanism and said access time exceeds a certain time, a number of said first hard disk drives according to disk drive redundancy of said RAID group to a power saving mode when said RAID group consists of only said first hard disk drives and sets an arbitrary number of said second hard disk drives to a

power saving mode when said RAID group consists of only said second hard disk drives;...”;

(Claim 20) “...a step of setting a number of said first hard disk drives according to disk drive redundancy of said RAID group to a power saving mode when said RAID group whose difference between the second time acquired from said time counting mechanism and said access time exceeds a certain time consists of only said first hard disk drives;...”;

(Claim 21) “...a power saving mode execution section which refers to said access time stored in said memory and sets a number of said hard disk drives of said RAID group as less than a total number of said hard disk drives constituting said RAID group to a power saving mode when the difference between a current time acquired from said time counting mechanism and said access time exceeds a certain time. ...”;

(Claim 22) “...a power saving mode execution section which refers to said access time stored in said memory, sets, for a RAID group whose difference between a second time acquired from said time counting mechanism and said access time exceeds a certain time, a number of said first hard disk drives of said RAID group as less than a total number of said first hard disk drives constituting said RAID group to a power saving mode when said RAID group consists of only said first hard disk drives and sets an arbitrary number of said second hard disk drives to a power saving mode when said RAID group consists of only said second hard disk drives;...”;

(Claim 23) “...a step of setting a number of said first hard disk drives of said RAID group as less than a total number of said first hard disk drives constituting said

RAID group to a power saving mode when said RAID group whose difference between the second time acquired from said time counting mechanism and said access time exceeds a certain time consists of only said first hard disk drives;...”;

As dependent claims 2-7 and 9-19 depend from an allowable base claim; they are at least allowable for the same reasons as noted *supra*.

The prior art made of record neither anticipates nor renders obvious the above-recited combinations for at least the reasons specified and as shown in Applicant's Arguments filed 27 April 2007.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Response to Arguments

Applicant's arguments filed 27 April 2007 have been carefully and fully considered, and are persuasive. As noted *supra* the case is in condition for allowance.
